

Dr. Andrew J. Margenot

Associate Professor

University of Illinois Urbana-Champaign

Andrew is a Professor of Soil Science at University of Illinois Urbana-Champaign, where since 2017 he leads a research team that evaluates the biogeochemical mechanisms that underpin soil functions in cropping systems, with a focus on nutrient cycling, fertilizer use efficiency and nutrient loss reductions. He also serves as Director of the Morrow Plots, established in 1876, and is working to establish multistate, on-farm tile drainage monitoring networks.
