

Agricultural Literacy & Student Learning Standards

What is Agricultural Literacy?

The National Agricultural Literacy Logic Model was developed in 2013 and defines an agriculturally literate person as:

A person who understands and can communicate the source and value of agriculture as it affects our quality of life.

The National Agricultural Literacy Outcomes (2013) can be found [here](#). These are detailed descriptions of what K-12 students should know about agriculture.

Student Learning Standards

[The National Agricultural Literacy Curriculum Matrix](#) is an online library of classroom-ready resources. There are more than 400 lessons with a focus on national education standards in science, social studies, and nutrition education for K-12 teachers. All resources are linked to Common Core Standards.

eLearning and AgBytes

The National Agriculture in the Classroom also has student-ready eLearning resources with active learning strategies! The [eLearning](#) lessons are broken into PreK-2nd, 3rd-5th, 6th-8th, and 9th-12th grades!

[AgBytes](#) is designed as a blog containing many learning activities for teachers to use!
